LCD MEDIA SCREENS HIGH IMPACT, EFFECTIVE, COST

Digital signage is one of the fastest growing marketing and messaging media around, but large screens do not suit all environments. Close Proximity Signage (CPS) puts your message next to the product.

Its not all about the size of the screen, or even what is on it. The most important thing to consider is the positioning of the screens.

Think about it for a moment, when you go shopping, do you spend your time in shops looking up ? or directly at the shelves ?

Close Proximity Signage or CPS for short is the new terminology for digital signage screens and or media players placed near consumers.

Our CPS solutions can be small screen LCD media players, Medium screen Digital signage.

These screens offer a standard consistent message across your business.

It is not uncommon for these CPS to demonstrate a quick pay back (R.O.I)

Content on CPS networks can be quickly changed via a SD Card, memory stick or even remotely.

ideal in high footfall areas - perfect for raising awareness of advertised products located near the screens

Designed to be placed directly at the point of purchase

Grab the audiences attention, increase awareness and influence purchase decisions

Low cost technology

Rapid return on investment (ROI)

VUEINTI MEDIA PLAYERS ARE MUCH MORE THAN JUST A DUMB SCREEN

From 5.0” Screens to 52” Vueinti’s range of Media players cater for all locations and requirements. Used as standalone screens or with Frames, Stands and fascia’s for that high impact promotion.

Ease of installation

Unlike Digital Signage, most of our Media players get their content off SD Cards or memory sticks - Playing many formats of Photos, Video & Audio

Scheduling

On many of our media players, using our special software you can schedule content - to play and turn on and off the screen all year round. Just design the schedule, turn on. Its that easy...

Motion Sensing

Triggers content, turns on or plays Audio , when sensor detects movement up to 1.5m away

Touch Screen Feature

Who needs a PC, we can create touch points across the whole of the media players screen and create up to 32 levels of interaction.

Integrated Printer Feature

Integrated with our touch screen media players - we can add a printer facility that can print information and discount coupons on demand.

Interact with your customers, without the expense of Pc’s

Without the need to use your companies I.T. resources.

Giving you and your Marketing team more impact without the headaches...

C-POD Standard Range
